Course survey Math 111, Fall 2017

This survey is for me to learn a little about you. A secondary purpose is to have you get up and running and practice using the Gradescope system, before any assignments for credit.

After completing the survey, read the Gradescope submission instructions on the reverse side, and submit the survey by Wednesday night.

N

Jame:								
1.	What is your hometown?							
2.	What is your class year at Amherst, and prospective major?							
3.	Are you involved with any student groups or sports?							
4.	What was your most recent math course?							
5.	What are your reasons for taking this course, and what do you hope to gain from it?							

Course survey Math 111, Fall 2017

6.	What	are	your	concerns	or	worries	about	this	course?

7. Anything else you'd like me to know about you?

Submitting homework on Gradescope

This survey is not a graded homework assignment, but you should use it to practice using the submission system on Gradescope, which you will use to submit all your homework in this course.

Before submitting each assignment, you should scan it to a pdf file (unless you type your work). The easiest method to do this is to use a smartphone app, but you can also use a scanner or any other method you choose, as long as it creates an easily readable pdf. There are several smartphone apps that can quickly and easily create a high-quality scan; see the following document for suggestions.

http://npflueger.people.amherst.edu/GS_guide.pdf

After you have scanned your assignment to a pdf, submit it on gradescope as follows.

- 1. Go to http://www.gradescope.com, click "Sign up for free," and select "I am a student."
- 2. Use the course code MGE28P, your name, and your amherst email address to sign up.
- 3. After logging in, select "Math 111" and the appropriate homework assignment.
- 4. Select "upload pdf" to submit your work in pdf format.
- 5. For each written question, select the pages of your submission where your solution appears.
- 6. Click save.

After your assignment is graded, you will be able to see your score on the written problems, along with comments, on gradescope.
